Reciprocal Privileges

Our current portfolio includes the following upscale clubs, all of which are among the leaders in their local club markets. Some were previously developer-owned and some were member-owned prior to our involvement; at each of them, we have gradually increased their membership rosters, added new amenities, invested in new capital improvements, and improved the level of service and course conditions. All are operating profitably and generating significant cash each year for additional capital projects in the future.

Today there are approximately 3,300 member-owned, private clubs in the U.S. Experts agree that more than half are carrying dangerous levels of debt. That debt makes capital reinvestment challenging. Without reinvestment, clubs struggle to retain members and compete for new ones. In the face of these challenges, hundreds of clubs have transitioned to non-equity status in recent years.

Visit our site to find out more about each of these clubs and begin planning your trip today!
